EDUCATION

MOTILAL NEHRU NATIONAL INSTITUTE OF TECHNOLOGY ALLAHABAD (NIT-A) Bachelor of Technology, Chemical Engineering (2023-present, 4th year)	Prayagraj, UP, INDIA
EWING CHRISTIAN PUBLIC SENIOR SECONDARY SCHOOL (CBSE Board) Class 12 th , PCM + CS (2022) – 96.4% Class 10 th (2020) – 97.6%	Prayagraj, UP, INDIA

TECHNICAL SKILLS

- **Programming Languages** : Python, BASH, C++ , Rust, JavaScript
- **Cybersecurity Tools**: Burp Suite, Nmap, Nessus, SQLMap, Wireshark, Metasploit, Kali Linux, Mimikatz, John the Ripper
- **Security Methodologies**: OWASP (Web, API, LLM), Penetration Testing (Network/Web), API Security, Wireless Security, Active Directory Testing, AWS Security, Privilege Escalation (LinPEAS), SIEM
- **Tools & Visualizations** : OpenCV, Power BI, Unreal Engine 5 (Game Dev), Open GL, Git/Github
- **Scientific & Modeling**: MATLAB, Aspen Plus, Arduino IDE, PixHawk

EXPERIENCE

- | | |
|---|-----------------------|
| Engineering Intern , PPGCL - Bara, UP, India | June 2025 – July 2025 |
|---|-----------------------|
- Analyzed the interaction between **digital control commands** and **physical system** responses within industrial control systems, gaining insight into the software-driven automation of critical infrastructure processes.
 - Studied **control logic software** used to remotely operate industrial hardware such as valves, pumps, and filtration units, examining how centralized systems manage, monitor, and automate critical operational equipment.

PROJECTS

- **TrafficLens** - A real-time network-based IDS built with Python, Scapy, and Npcap, combining signature-based detection with an ML-based anomaly scoring model to detect threats, log incidents in JSONL, and visualize alerts via a browser dashboard.
- **Phishing Simulator** - Developed a phishing simulation platform using Flask, CSV, and OS modules to simulate phishing scenarios, demonstrate common attack techniques, and raise user awareness of social engineering threats.
- **PromptProbe** - A Python-based prompt injection testing framework for LLM applications, featuring JSON-defined attack suites, regex-based vulnerability scoring, and multi-provider support (OpenAI, Gemini, Claude) with HTML/JSON/CSV reporting.
- **Crypt Raider** - Designed and implemented a video game using Unreal Engine and C++ , incorporating physics simulations and gameplay mechanics to illustrate core game development principles and real-time environment interaction.

ACHIEVEMENTS

- 1st Place - Code-Indrome 2024, flagship coding competition at Avishkar (University Annual Festival).
- Ranked within the top 1% of cybersecurity practitioners globally on TryHackMe. [View Profile](#)
- Actively participating in Bug Bounty programs.
- Medalist - International Mathematics Olympiad and National Science Olympiad, multiple consecutive years.

PROFESSIONAL DEVELOPMENT (SELF-STUDY)

- **SANS FOR589 – Cybercrime Investigations**: Independently completed full curriculum and capstone challenge covering dark web tradecraft, cryptocurrency tracing, and cybercriminal attribution.
- **AI Hacking 101**: Self-studied AI/LLM threat modeling, recon & fingerprinting, prompt injection, jailbreaking, RBAC, and RAG security – applied directly in the PromptProbe project above.

EXTRACURRICULAR ACTIVITIES

- **Coordinator, Cybersecurity Club**: Orchestrated technical workshops and mentored members on CTF strategies and security.
- **Technical Project Mentor (Robotics, Aeromodelling, Astrowing)**: Guided cross-functional teams in the development of hardware-software integrations, overseeing project lifecycles from concept to execution.
- **Coordinator, IIC & Music Club**: Led technical outreach for flagship innovation summit UDBHAV and coordinated the university's inter-university music competition team.

CERTIFICATIONS

- **TryHackMe WEB1 Professional**: Web Application Penetration Testing professional certificate proving skills in Web App Testing.
- **Junior Penetration Tester**: TryHackMe Learning Path – Practical experience in network security and exploitation techniques.
- **Blue Team Junior Analyst (BTJA) Pathway**: Security Blue Team – Focused on defensive operations and incident response.
- **Offensive Security Certification in Ethical Hacking**: Cisco Verified – Hands-on experience with core penetration testing methodologies and ethical hacking.
